

# COMMUNITY WILD WATCH

**Free wildlife recording sessions with West Wales Biodiversity Information Centre. A great way to discover your local wildlife.**

Part of the **Your Wild Patch** project, to build wildlife identification skills in the community and help people to monitor their local patch - funded by Welsh Government's Local Places for Nature biodiversity grant scheme. Regular **Community Wild Watch** sessions will move around the different communities of Ceredigion, Pembrokeshire and Carmarthenshire.

We'll explore the local wildlife habitats together, record the species we find and have fun looking at nature in a relaxed, practical session. Training on recording and species identification will be provided. We'll look at all different types of wildlife, focusing on different groups in different seasons. We can offer advice and resources to help you carry on recording the biodiversity of your local patch. **All welcome, regardless of experience.**

If you want to learn more about your local biodiversity, meet other like-minded enthusiasts, or just look at cool stuff in nature, this is for you!
